

Greenhouse Gas (GHG) Inventory & Management

Successfully measure and benchmark your company's GHG Emissions.

Is your organization positioned to respond to new, increased, or ongoing reporting of GHG emissions?

- Has your company been able to create and verify your baseline emissions data?
- Are you able to demonstrate continual improvement in reducing emissions?
- Are you engaged in international, national, sector, regional and/or local GHG reduction initiatives?

We can assist you:

- Inventory your GHG contributors from all sources
- Select and apply a calculation methodology
- Develop the skill set to measure and manage credible, defensible greenhouse gas data
- Validate findings and be assured when reporting and disclosing GHG Inventory

WHY WMEP/WSBC

- Together WMEP and WSBC have helped hundreds of companies learn, apply, and be recognized for their organization's sustainability actions through their highly successful Green Masters Program.
- WMEP has helped hundreds of companies markedly improve their resource utilization and waste reduction through its well-recognized Profitable Sustainability Initiative™ program.
- Together we bring an unparalleled amount of talent, expertise and practical experience in the field of sustainability to guide your organization's sustainability strategy and GHG reporting.
- Team members are accredited to GHG Protocol and have success in helping companies with scope, 1, 2 & 3.
